

## OTHER RESEARCHERS IN

### MOLECULAR BIOLOGY AND BIOTECHNOLOGY DIVISION

**NIEMOGHA** Mary-Theresa (PhD)

RESEARCH INTEREST:

**Senior** Research Fellow

Molecular Epidemiology. Environmental and Clinical niches of bacterial pathogens  
Chemotherapy.  
Sexual and Reproductive Health

**OYEDEJI** Kolawole Solomon (PhD)

RESEARCH INTEREST:

**Senior** Research Fellow

Helicobacter pylori infections in patients with upper gastrointestinal pathology in Nigeria.  
Molecular epidemiology of helicobacter infection in children  
And the treatment strategies.  
Best diagnostic and affordable technique for detecting helicobacter pylori infection in Nigeria. (Homegrown techniques).  
Extra digestive helicobacter infections and helicobacter induced malignancy.  
Research ethics.  
Helicobacter and HIV infections.

**BRAI** Bartholomew (PhD)

RESEARCH INTEREST:

Research Fellow II

Nutritional Biochemistry. Molecular epidemiology of non-communicable diseases

**BAMIDELE** Tajudeen

Research interest:

Research Fellow II

Epidemiology of Sexually Transmitted Infectious in Female (High Risk)

**NWAOKORIE** Francisca Oby (PhD)

Research interest:

Research Fellow II

Anaerobic Bacteriology Isolation and molecular characterization of Anaerobic species associated with clinical infections In Nigeria. Microbiological assay of Odontogenic infections and Halitosis  
Molecular epidemiology of communicable diseases.  
Health Research Ethics.  
Human/Infrastructural Capacity Building and Laboratory Management

**GOODLUCK** Helen

Research interest:

Junior Research Fellow

Molecular Epidemiology of Infectious diseases

**YISAU** Jacob

Research interest:

Junior Research Fellow

Helicobacter Pylori infection in Children
